

# Microlab: Fruits+Veggies!

ASP  
Ms. MacLure

**Objective:** You will explore complementary color palettes, and composition using chalk pastel and black paper.

**Frameworks Objective (3.8):** Use color, line, texture, shape, and form in 2D work to create volume.

## WHAT TO DO

You will focus on a microscopic view of a fruit or vegetable.

-Choose a vegetable or fruit to render. Make 5 thumbnails in your sketchbook, exploring different points of view you might take.

-On a larger piece of paper (black), begin to sketch out the composition using chalk pastel.

-Like in the demo, blend colors, but also allow some strokes to remain textured. Pay close attention to the light source on the food, and articulate the shadow core (the darkest part of the shadow that's found between the highlight and the darkness.)

**Materials**  
Black paper, chalk pastel.
